PROFESSIONAL SUMMARY

Senior technical leader with over 14 years of experience architecting and delivering scalable SaaS solutions across the full stack. Deep hands-on expertise in C#/.NET, TypeScript, and React, combined with a strong track record of leading and mentoring high-performing engineering teams. Proven ability to define architecture, establish engineering standards, and drive delivery in fast-paced, high-growth environments including Trade Me and PartsTrader. Passionate about balancing strategic technical direction with pragmatic, hands-on execution — staying close to the code while coaching engineers and championing a culture of quality, curiosity, and continuous improvement.

TECHNICAL SKILLS**Languages & Frameworks**

- C#/.NET, TypeScript, Node.js, React, NextJS, Fastify, Tailwind CSS, single-spa, tRPC, Zod

Cloud, Infrastructure &**DevOps**

- AWS, Azure, Terraform, Docker, Kubernetes, OpenShift, Helm, ArgoCD, GitHub Actions, TeamCity, Nx

Data & Integration

- SQL Server, MySQL, PostgreSQL, Prisma, RabbitMQ, Redis, REST APIs, OpenAPI

Quality & Observability

- Playwright, Cypress, Jest, Vitest, NewRelic, LaunchDarkly, Percy, MSW

PROFESSIONAL EXPERIENCE**Independent Contractor****ANZ Bank****August 2025 - Present**

- Leading architecture and development of open banking statement retrieval services, defining technical approach and integration patterns.
- Coordinating delivery across onshore NZ and offshore Indian teams, ensuring alignment on architecture, standards, and quality.
- Designing scalable, secure APIs in a regulated banking environment with strict compliance and reliability requirements.
- Key technologies: Node.js, API Architecture, Open Banking, OpenShift, CI/CD

Technical Lead**PartsTrader****October 2022 - July 2025**

- Led architecture and delivery for the supplier platform of the largest automotive parts SaaS marketplace in the US, serving thousands of businesses.
- Defined and enforced coding standards, architectural patterns, and security practices across the engineering team.
- Mentored engineers through code reviews, pair programming, and coaching, fostering a high-performing, collaborative culture.
- Architected scalable full-stack solutions across React microfrontends, Node.js services, and .NET backends, balancing speed with long-term maintainability.
- Drove R&D initiatives including prototyping new approaches and evaluating emerging technologies for adoption.
- Key technologies: C#/.NET, TypeScript, React, Node.js, Fastify, MySQL, AWS, Docker, Microfrontends, Agile
