PROFESSIONAL SUMMARY

Senior technical leader with over 14 years of experience architecting and delivering scalable SaaS solutions across the full stack. Deep hands-on expertise in C#/.NET, TypeScript, and React, combined with a strong track record of leading and mentoring high-performing engineering teams. Proven ability to define architecture, establish engineering standards, and drive delivery in fast-paced, high-growth environments including Trade Me and PartsTrader. Passionate about balancing strategic technical direction with pragmatic, hands-on execution — staying close to the code while coaching engineers and championing a culture of quality, curiosity, and continuous improvement.

TECHNICAL SKILLS

Languages & Frameworks

- C#/.NET, TypeScript, Node.js, React, NextJS, Fastify, Tailwind CSS, single-spa, tRPC, Zod

Cloud, Infrastructure &**DevOps**

- AWS, Azure, Terraform, Docker, Kubernetes, OpenShift, Helm, ArgoCD, GitHub Actions, TeamCity, Nx

Data & Integration

- SQL Server, MySQL, PostgreSQL, Prisma, RabbitMQ, Redis, REST APIs, OpenAPI

Quality & Observability

- Playwright, Cypress, Jest, Vitest, NewRelic, LaunchDarkly, Percy, MSW

PROFESSIONAL EXPERIENCE

Independent Contractor**Stats NZ****March 2026 - Present**

- Building data pipelines for the New Zealand Census programme across Azure, Salesforce, and .NET.
- Leveraging Azure Function Apps and related services to deliver scalable, reliable data-processing infrastructure.
- Designing resilient integration patterns to handle large-scale national census data with strict reliability requirements.
- Key technologies: Azure, Azure Functions, Salesforce, .NET, Data Pipelines

Independent Contractor**ANZ Bank****August 2025 - March 2026**

- Led architecture and development of open banking statement retrieval services, defining technical approach and integration patterns.
- Coordinated delivery across onshore NZ and offshore Indian teams, ensuring alignment on architecture, standards, and quality.
- Designed scalable, secure APIs in a regulated banking environment with strict compliance and reliability requirements.
- Key technologies: Node.js, API Architecture, Open Banking, OpenShift, CI/CD

Technical Lead**PartsTrader****October 2022 - July 2025**

- Led architecture and delivery for the supplier platform of the largest automotive parts SaaS marketplace in the US, serving thousands of businesses.

- Defined and enforced coding standards, architectural patterns, and security practices across the engineering team.
- Mentored engineers through code reviews, pair programming, and coaching, fostering a high-performing, collaborative culture.
- Architected scalable full-stack solutions across React microfrontends, Node.js services, and .NET backends, balancing speed with long-term maintainability.
- Drove R&D initiatives including prototyping new approaches and evaluating emerging technologies for adoption.
- Key technologies: C#/.NET, TypeScript, React, Node.js, Fastify, MySQL, AWS, Docker, Microfrontends, Agile

Integration Consultant

Open Polytechnic

September 2021 - March 2022

- Defined and implemented the organisation's first CI/CD pipeline, transforming deployment practices and delivery confidence.
- Architected migration from legacy monolith to microservice architecture on Azure, reducing technical debt and improving scalability.
- Established automated code quality standards and security scanning, raising the engineering bar across the team.
- Key technologies: C#/.NET, Azure, CI/CD, Microservices, SQL Server

Senior Developer

Kiwi Wealth

March 2019 - August 2020

- Led greenfield development of a customer-facing SaaS portal, making end-to-end architecture decisions from design through delivery.
- Built a shared React component library that accelerated UI development and established frontend consistency across teams.
- Drove adoption of MuleSoft API architecture, defining integration patterns for the wider organisation.
- Implemented analytics and A/B testing frameworks that measurably improved user conversion rates.
- Key technologies: React, C#/.NET, API Architecture, SQL Server, Analytics

Lead Developer

Trade Me

March 2016 - March 2019

- Led technology direction for Trade Me Insurance and LifeDirect — high-traffic SaaS platforms serving millions of users.
- Architected and executed cloud migration from on-premises to AWS, improving system reliability, scalability, and operational cost efficiency.
- Built and mentored a high-performing delivery team, providing coaching, career development support, and technical guidance.
- Collaborated closely with product and UX teams to define technical solutions aligned with business goals.
- Key technologies: C#/.NET, AWS, SQL Server, JavaScript, Agile

Developer

Trade Me

October 2011 - March 2016

- Grew from graduate to senior developer at New Zealand's largest online marketplace, contributing across Travel, Marketplace, Property, and Jobs.
- Developed and maintained high-traffic, white-label systems serving millions of users with strong uptime and performance requirements.
- Built full-stack expertise across C#/.NET backends, SQL Server, and frontend technologies.
- Key technologies: C#/.NET, SQL Server, JavaScript

CERTIFICATIONS

- | | |
|--|--|
| • AWS Certified Solutions Architect – Professional | <i>Issued: Jan 2023, Expires: Jan 2026</i> |
| • AWS Certified DevOps Engineer – Professional | <i>Issued: Nov 2022, Expires: Nov 2025</i> |
| • AWS Certified Solutions Architect – Associate | <i>Issued: Oct 2022, Expires: Jan 2026</i> |
| • AWS Certified Developer – Associate | <i>Issued: Sep 2022, Expires: Nov 2026</i> |
| • AWS Certified Cloud Practitioner | <i>Issued: Aug 2022, Expires: Aug 2025</i> |

EDUCATION

Bachelor's Degree in Computer Science
Victoria University of Wellington

2009 - 2012
